Digital Forensic Report

1 Introduction

1.1 Instructions

- Carry out forensic examination of 3 devices [written]
- Identify information contained within devices [written]
- Generate expert witness report [written]
- Presentation of findings [oral]

1.2 Qualifications and experience

I have a BTEC diploma in general IT grade D*D*D* which provided me technical experience. I am currently in my final year of studying BSc (Hons) Computer and Digital Forensics at Northumbria University. During this course I have gained expertise using forensics software such as Encase, Cellebrite UFED, Magnet RAM and Magnet AXIOM. As part of this final year of university I am developing an in-depth forensics project which involves studying many sources of digital evidence. This makes me qualified to provide expertise into the digital forensics field.

1.3 Summary of case and tasking

I have been asked to analyse 2 mobile phones and a PC (personal computer) seized to provide further evidence to support this case.

The report I have been provided states that on the 11/11/2019 a report of assault was issued against a Mr. Declan Donnelly. On the 03/12/2019 Mr. Donnelly was arrested on the suspicion of assault and possession with intent to supply. Cannabis, LSD, Cocaine and the PC was seized from Mr. Donnelly's property. The defendant provided the password "Pa\$\$w0rd!23" for the PC. Mr. Donnelly provided the names Mr. Billy Sanderson and Mr. Jack Thompson as people involved in the crimes committed. On the 06/12/2019 both Mr. Sanderson and a Mr. Thompson were arrested for the suspicion of possession with intent to supply. Initially the report states that 2 mobile phones were seized, one from Mr. Sanderson and another from Mr. Thompson. However, later the report lists one of the phones, a Samsung, as belonging to Mr. Thompson and the other, an Apple, belonging to Mr. Donnelly.

I have also been provided with a witness statement from Mr. James Conway, a Police Constable who assisted in the arrest of Mr. Donnelly, this statement agrees with the initial comment, that one phone was seized from Mr. Sanderson and another from Mr. Thompson. The statement also states that "It is believed that all defendants in question used multiple social media platforms and other methods to distribute illegal substances".

1.4 Statement of compliance

I understand my duty as an expert witness to the court to provide independent assistance by way of objective unbiased opinion in relation to matters within my expertise. I will inform all parties and where appropriate the court in the event that my opinion changes on any material issues.

2 Forensic Examination

I, Shona Start, will be performing the analysis of the devices in question. Images of these devices were provided to me by Philip Anderson, the programme leader for the BSc (Hons) Computer Forensics course at Northumbria University. Comprehensive notes have been taken throughout the examination process and can be found in appendices figure 2.

2.1 Tools and Methods

Cellebrite UFED Physical Analyser version 7.16.0.93 is an application designed for mobile forensics and supports a large range of mobile devices. It was used to analyse, decode and report data from the Apple and Samsung phones. This software was chosen because it is one of the most advanced mobile forensic software applications and one I have the most experience using. The tools it provides improve efficiency throughout an investigation.

Encase v8.08 is an investigation platform that provides many capabilities in relation to digital forensics. This software was used to analyse and report data from the PC. This software was chosen because of its many tools including its report generation tool, bookmarking system and tools for extracting data. These tools help with efficiency and effectiveness throughout an examination. Encase also has a track record of court-acceptance.

AXIOM Examine is another digital investigation platform that provides many digital forensics capabilities. This software will be used to validate the results from Encase to ensure data integrity. This software was chosen because I have experience using it and in my experience it is more stable than Encase. Version v3.1.0 of this software will be used.

ACPO (Association of Chief Police Officers) Good Practice Guide for Computer Based Electronic Evidence will be followed. This is currently the most up-to-date guideline for investigating cyber security incidents and crime followed by British law enforcement. One of the ways I will comply with this is by ensuring evidence produced is unmodified from when it was first collected at the point of seizure. I have had no contact with the original devices only the clones taken and will be validating data from these clones with AXIOM Examine where possible.

ADFM (Abstract Digital Forensic Model) will also be followed where appropriate. This is a nine phase model starting with "identification", this is determining the type of incident that has occurred, and was discussed in the summary of case and tasking. The second phase is "preparation", where tools, techniques and other requirements are planned and prepared. The next phase is "approach strategy", which involves developing a procedure to maximise the collection of evidence while minimizing the impact of this collection on victims. I was not in charge of collecting the evidence so this responsibility is not mine. The fourth phase, named "preservation" and the fifth phase is "collection"; Once again these are not my responsibility as a duplication of the digital evidence has already been taken and this is how I will analyse items. Phase six is "examination"; the search of evidence relating to the suspected crime and phase seven is the "analysis of the evidence collected", including determination of the significance of

------------------------------------	------------------------------	--------------	--------------------------------------

the evidence. Significant evidence is listed in this report which is the eighth phase, “presentation”. The last phase is the returning of the physical and digital property to its owner.

2.2 Evidence

Table 1 - Items of Evidence

Item	Serial Number	Description	Type
1		PC seized from DONNELLY, Declan	H
2	F4HW2DR1JC67	Apple iPhone 8 (A1905) smart phone	CP
3	RF8GA2MR8DZ	Samsung smart phone seized from THOMPSON, Jack	CP

Type Codes: S-System | H-Hard Drive | SD – Secure Digital Card | USB – USB Drive | CD-CD | D-DVD | P-PDA | CP-Cell Phone |

2.3 Analysis

2.3.1 Analysis Item 1 - PC

Item one contained one (1) hard drive, Seagate 80GB, the data extracted from this hard drive has been analysed using EnCase v8.08 and the relevant data is shown below.

Acquisition MD5: 49ca66f1d9f34736747443242fae1a96

2.3.1.1 System Information

System information on this item has been collected from the Windows Registry. The Windows registry is a database containing data required for the configuration of user accounts, applications and hardware devices on a Windows machine. The registry consists of 4 main files, these are SAM (Security Account Manager), System, Security and Software files. From these registries it can be determined that the OS (Operating System) present on this machine is Windows 10 Pro, build number 18362. This OS was installed on the 23/10/19 at 10:22:33 and the last shutdown of this system was on 06/01/20 at 20:56:40. The time zone on this system has been set to (UTC+00:00) Dublin, Edinburgh, Lisbon, London.

2.3.1.2 User(s)

The registered owner for this item is "student"; this is also the name of the primary account on this system. The account was last accessed on the 06/01/20 at 20:57:48. The profile path for this account is "C:\Users\student". A profile path is the location on a system where all data relating to that profile is stored.

2.3.1.3 USB Devices

A USB (Universal Serial Bus) is any device that is plugged into a system via the USB port, for example, external hard drives, memory pens, printers, smartphones etc. Three USB devices have been previously plugged into this system. These devices could hold more information relating to the case if they can be located:

Serial Number	Device	Last Mapped Drive
201305311000&0	Generic- USB3.0 CRW-CF/MD USB Device	D:\
201305311000&1	Generic- USB3.0 CRW-SD USB Device	E:\
201305311000&2	Generic- USB3.0 CRW-MS/HG USB Device	F:\

2.3.1.4 Recycle Bin

The Recycle Bin contains files and folders which have been deleted but not permanently removed from a device. Each user on a Windows OS has their own dedicated Recycle Bin, this will contain only files and folders deleted by that user. A users Recycle Bin can be identified by their profile path.

Drugs and crime

It's not just drug dealers who will be arrested if they get caught. Carrying drugs for personal use could get you a large fine or time in prison too. It's a good idea to understand the laws surrounding drug classifications, possession and intent to supply

Drugs and the law

It's illegal:

- to have or own drugs
- to supply anyone with drugs
- to make drugs
- to import or export drugs

It's also illegal to allow premises you own, rent, use or occupy to be used for any drug-related activity.

2.3.3 Analysis Item 3- Samsung

2.3.3.1 System Information

This item is a Samsung SM-G920F running Android OS 6.0.1. This device was last activated on the 07/05/2019 at 12:24:17 and is set to the time zone (UTC+00:00) London (Europe). The last registered SIM phone number on this device was +447588039513. Several sources of cloud data were found on this device. These include AmazonShoppingTitle, Dropbox, Instagram, Twitter and UberTitle; these cannot be accessed. However, Facebook, Messenger (Facebook), Gmail, Google Backup, Google Calendar, Google Chrome Sync, Google Contacts, Google Drive, Google Hangouts, Google Home, Google Location History, Google Passwords, Google Photos, Google Takeout and Google Tasks are accessible. I do not have the knowledge or equipment to analyse cloud data. However, it can be determined that a Facebook account with account name 100042564824515 and a google account with the account name billysanderson70@gmail.com were signed into this device.

To: 07541375509 Toma	31/10/2019 16:31:31	I've had to borrow coin off my granny to get a new phone since I'm skint for the casino stint! I think I'm gonna take decca up on that offer, I need to pay my granny back asap as she needs the money
From: 07541375509 Toma	31/10/2019 16:34:42	I'm also skint atm like, this whole having a lass thing isn't cheap I tell ya, I'm gunna get in touch with decca and try and get something set up
To: 07541375509 Toma	31/10/2019 16:45:18	Hey, come talk with me in this Discord server: https://discord.gg/Ab7De7
From: 07541375509 Toma	04/11/2019 22:10:55	Did you get a chance to get the goods from Deca? 🤔🤔
To: 07541375509 Toma	05/11/2019 19:05:49	Alright pal, been asleep all day! missed some important lectures but tbh we won't be needing a degree with the dosh we're gonna be making
To: 07541375509 Toma	05/11/2019 19:08:11	Tell me about it 🤔 had to try out some of the good stuff we flogged last night 🤔

From: 07541375509 Toma	05/11/2019 19:10:05	You're a mad lad, speaking of that stuff... Deca said on the discord that he has some more drop offs we could do?? Am getting a taste for this life now like!
To: 07541375509 Toma	05/11/2019 19:15:11	Weyaye, of course I want more man! I'll get on this discord in a bit. Are we gonna get some posts on the insta account and watch the dosh roll in?
From: 07541375509 Toma	05/11/2019 19:15:51	Aye we need to, just don't wanna risk getting caught
To: 07541375509 Toma	05/11/2019 19:16:10	Don't be daft, nobody is gonna come after us, they've got nonces and that to be catchin
From: 07541375509 Toma	06/11/2019 10:30:53	I'm outside now, you coming down?? We'll quickly fly around to deccas and get the goods
From: 07541375509 Toma	13/11/2019 10:22:56	Do you want me to give you a ring and we can talk about the Instagram idea?

Yo, I've attached the spreadsheet that I made so we can track orders and profits.
Might as well do it properly if we're doing it at all!
I've put a password on it in-case someone else gets a hold of it. The password is 'druglords' don't tell anyone.

2.2 Summary of conclusions reached

On the 3rd of December 2019, Mr. Donnelly was arrested on suspicion of assault and possession with intent to supply and on the 6th of December 2019, both Mr. Sanderson and a Mr. Thompson were arrested for the suspicion of possession with intent to supply. Data relating to the arrests for suspicion of possession with intent to supply has been found across all three devices. On all devices there are images relating to cannabis and drug use (2.3.1.4, 2.3.1.6, 2.3.1.7.3.2, 2.3.1.7.3.1, 2.3.2.6, 2.3.3.8). Furthermore, on all devices there are searches and website visits relating to drugs (2.3.1.7.1, 2.3.2.5, 2.3.3.7). However, no data in relation to the report of assault against Mr. Declan Donnelly was found on any of the devices.

Mr Donnelly’s personal computer (item 1) provides data that suggest communications were taking place through the application Discord (2.3.1.7.3.1). Data in the files 000004.log and 000005.ldb provides drafts of messages typed out within the application. Within these messages there are phrases that could be referring to the supplying of drugs, for example:

- “av got a backup plan luckily, gonna get my main man who supplies to take orders on the dark web again, ez money”
- “Good idea, i'll throw some more posts up for the pills tbh, i sold a”
- “Well•i course ha •€, proper seeing triangle shapes a•6€wa and that man ;)”
- “gotta drop a few pills off at the accommodation on the way over but am jus”
- “first, just got a new order of pills in, fancy floggin em in town”
- “O wanna come r•0,. Shit seems•ø•be mov•úha lot quicker than expected•)•ill give•~• 2 ounce”

------------------------------------	------------------------------	---------------	--------------------------------------

There is also data on item 1 that suggests Tor browser (2.3.1.7.2) was used on this device to access dark web drug websites; specifically the files TOR Drug Links.txt (2.3.1.5.2), eucanna.PNG (2.3.1.6) and Favicon.ico (2.3.1.7.2).

The password protected file Drug Profits.xlsx gives details of two people, Hugo Hart and Caitlin O'Moore, and suggests they purchased Class B Drugs (2.3.1.5.2). Copies and previews of this file can be found on both Item 2 and 3. On item 2 the images IMG_0023.PNG is almost an exact copy of this file and preview.jpg could be a more detailed version (2.3.2.6.1). The names "Hugo Hart" and "Caitlin O'Moore" show up in the note "Masterplan" (2.3.2.7) on this item. On item 3 in the email "Drug spreadsheet" sent by JackThompson9991@outlook.com (2.3.3.5.1), the body of this email states that a "spreadsheet" is attached that is used for taking orders and keeping track of profits. A password is "on it in-case someone else gets a hold of it" the password is noted in the email as the same password as the file Drug Profits.xlsx on item 1. However, no data relating to attachments in this email was recovered.

Data on items 2 and 3 suggest communication with a person named Decca or Deca. Examples of Decca/Deca being mentioned are shown below:

- The contact Decca is on both items (2.3.2.2, 2.3.3.2)
- In the note "Masterplan" on item 2 "Deca supplies the goods Me and Sandy collect from Deca and deliver to customers" (2.3.2.7)
- SMS messages between items 2 and 3 occasionally mention a Decca/Deca:
 - "Phooo you're telling me I've had to pull a sick today because I'm still ropey! That decca was an absolute mad man at that session mind"
 - "I've had to borrow coin off my granny to get a new phone since I'm skint for the casino stint! I think I'm gonna take decca up on that offer, I need to pay my granny back asap as she needs the money"
 - "I'm also skint atm like, this whole having a lass thing isn't cheap I tell ya, I'm gunna get in touch with decca and try and get something set up"
 - "Did you get a chance to get the goods from Deca? ??"
 - You're a mad lad, speaking of that stuff... Deca said on the discord that he has some more drop offs we could do?? Am getting a taste for this life now like!"
 - "I'm outside now, you coming down?? We'll quickly fly around to deccas and get the goods"

Inaccessible cloud data for Instagram was found on both items 2 and 3. Evidence has been found that suggests Instagram was used for something drug related but this account was taken down around the 14/11/2019:

- SMS message from item 2 to item 3 "Do you want me to give you a ring and we can talk about the Instagram idea?" (2.3.2.4)

Prepared by: Shona Start	Signature: S.Start	Page 38 of 55	Date of Report: 13/02/2012
------------------------------------	------------------------------	---------------	--------------------------------------

- Searches and website visits that suggest the user of item 2 was researching “how to delete an instagram post”, “can the police track you down from an instagram account” and “instagram account got banned” (2.3.2.5)
- Note “Masterplan” on item 2 references to “goods” being sold on “Instagram to get more sales” (2.3.2.7)
- Searches and website visits suggesting the user of item 3 was researching “selling drugs on instagram” (2.3.3.7)
- Image e57785ad.clean on item 3 is located in the cache for Instagram. This photo depicts a woman holding a clear bag with what looks like cannabis inside (2.3.3.8.1)
- 000005.ldb message draft “Nawww lads, •=Đinstagram has been removed :(after all our work on l” (2.3.1.7.3.2)

2.2.1 Opinion regarding findings

The opinions I have formed from the data collected are that the three devices were all used to research and carry out communications about illegal drug activities. Both item 1 (Mr. Donnelly’s personal computer) and Item 2 (Mr. Thompson’s mobile phone) were password protected. However, item 3 was not password protected. This may mean that the device was used by other individuals. If I assume that all devices were used only by their owners my opinions are as follows:

It is likely the names Sandy, Decca/Deca and Toma are nicknames for Mr. Sanderson (Sandy), Mr. Donnelly (Decca/Deca) and Mr. Thompson (Toma). It is my opinion from SMS messages between items 2 and 3 that Mr. Thompson and Mr. Sanderson met Mr. Donnelly on roughly the 28th October 2019. Shortly afterwards, Mr. Donnelly began supplying them with narcotics which they would sell on to others. It seems that Hugo Hart and Caitlin O’Moore were two people in which Mr. Thompson and Mr. Sanderson supplied substances.

The similar photos collected from the cache folder for Discord create a possibility that most of the conversations between the three individuals took place on the application Discord. Data on item 1 from the files 000004.log and 000005.ldb suggest many of these conversations were likely related to the sale of narcotics. The application Instagram may have been primarily used by Mr. Thompson and Mr. Sanderson to sell drugs. However, as no cloud data was recovered from either device there is insufficient data for me to conclude this was the definite use of the platform.

3 Reflection of pragmatic difficulties

One of the difficulties I have faced with the completion of this forensics examination is my inexperience with the forensics tool Cellebrite UFED Physical Analyser and mobile forensics in general. In order to fill the gaps in my knowledge relating to mobile forensics, I revised the content provide in class and conducted some of my own research online prior to analysing the mobile phones. I also overcame my lack of experience with UFED Physical Analyser by experimenting with the system in order to become more familiar with it and studying the user manual provided by Cellebrite.

One of the other forensics tools used, Encase, also caused challenges. The first initial difficulty I had was with creating the case files. Attempts at creating the case on a portable hard drive repeatedly failed. This issue was overcome by perseverance and multiple different attempts at creation of the case. I also found the platform Encase had many stability issues that would cause it to crash and freeze. This issue could not be completely resolved but consistently saving my work and keeping my comprehensive updated reduced the amount of work lost by this. However, on one occurrence the platform crashing caused a complete corruption of the case file. This was resolved because of backups that I had in place in case of such an occurrence. Much of my work was recovered because of this.

One of the major challenges with completing this examination was the Covid-19 pandemic. This pandemic caused many disruptions including the closure of university buildings. This caused many issues as working from home, a none working environment, is more challenging; it reduced the amount of time I was able to work on the examination especially considering only device available to me with the capacity to run the forensics software was a shared device. This difficulty could not be resolved, but the examination could still be completed through determination and working the best I could even with these limitations.

4 Statement of truth

I confirm that I have made clear which facts and matters referred to in this report are within my own knowledge and which are not. Those that are within my own knowledge I confirm to be true. The opinions I have expressed represent my true and complete professional opinions on the matters to which they refer.

Drugs and crime

It's not just drug dealers who will be arrested if they get caught. Carrying drugs for personal use could get you a large fine or time in prison too. It's a good idea to understand the laws surrounding drug classifications, possession and intent to supply

Drugs and the law

It's illegal:

- to have or own drugs
- to supply anyone with drugs
- to make drugs
- to import or export drugs

It's also illegal to allow premises you own, rent, use or occupy to be used for any drug-related activity.

If you are found with drugs near a school, youth facility or location where young people formally meet, the courts will treat this as an aggravating issue and impose higher penalties.

Drug dependency

For many drug users, increased drug use can lead to dependency and this condition can lead to many new problems. As drug misuse and dependency increases it can become more difficult to work and maintain a job. This can lead to financial problems as bills, such as mortgages, rent and rates, together with other household bills, cannot be paid.

Even social security benefits might not be enough income to pay for drug use. Money may need to be borrowed and if repayments can't be met, this brings other problems.

As drug misuse increases, some people may use crime, such as burglary, to find items that can be stolen and sold to others to raise money to buy more drugs. Others may resort to more serious crimes such as robbery, theft, extortion - anything to secure money to buy drugs. Some people will resort to dealing to raise income, but if caught by the police this can lead to higher penalties being given by a court.

It is important to realise that getting involved in drugs can bring many other problems that can affect your health, your relationships with your family and friends, your financial wellbeing and where you live.

How drugs are classified

Drugs are put into one of three categories, according to how dangerous they are and the impact they have on society - not necessarily the individual. It's worth remembering that different drugs affect people in different ways. Drugs in all classes, not just those in 'Class A', are very dangerous.

The three categories of drugs are Class A, Class B and Class C:

- heroin, cocaine, ecstasy and LSD are Class A drugs
- speed, cannabis, ketamine, mephedrone and some amphetamines are Class B drugs
- anabolic steroids, GHB and some tranquilisers are Class C drugs

"Temporary Class Drug Banning Orders" are for psychoactive substances (sometimes mislabelled as legal highs).

The chemical composition of these new substances changes quickly. A temporary banning order allows a substance to be banned until analysis can be carried out to assess the potential risks to human health.

Possessing drugs

If the police stop you and you are in possession of drugs, it is likely that you will be arrested. The drugs found will be seized and destroyed.

Prepared by: Shona Start	Signature: S.Start	Page 41 of 55	Date of Report: 13/02/2012
------------------------------------	------------------------------	---------------	--------------------------------------

If you're caught with drugs you may be charged with possessing (or possession with intent to supply - a much more serious offence) controlled drugs, whether it's yours or not. If you're aged 17 or under, the police are allowed to tell your parent, guardian or carer that you've been caught.

If the police find you with drugs, the punishment that you receive will depend on the class of drug, the quantity of drugs found, where you are found (if found close to a school or youth club, the court can give a higher sentence) and your personal history (previous crimes, but importantly, any previous drug offences).

For example, if you are under 18 years old and found with a Class C drug, and depending on the circumstances, it should be anticipated that, as a minimum, you will receive a formal (recorded) warning and a police caution. You may also be referred to the police Youth Diversion Scheme. If over 18 years it should be anticipated that you will receive a caution and further action, such as prosecution, will depend upon the decision reached by the Public Prosecution Service.

- [Risks of taking drugs](#)

History of drug offences

If you're found with a Class A or B drug and have a history of drug offences, you will be prosecuted.

The maximum sentences for possession of each class of drug are:

- up to seven years in prison or an unlimited fine (or both) for a Class A drug
- up to five years in prison or an unlimited fine (or both) for a Class B drug
- up to two years in prison or an unlimited fine (or both) for a Class C drug

Sentences can increase if you are dealing drugs or supplying them - even if it's just to friends with no money changing hands.

- [Youth justice](#)

Cannabis

Cannabis is illegal. It's a Class B drug.

The maximum penalty for possession of cannabis is five years imprisonment. A magistrate's court can also impose a fine of up to £2,500.

If you're prosecuted for supplying or producing an illicit drug, the maximum prison sentence is 14 years.

Psychoactive substances (sometimes mislabelled as legal highs)

It's an offence to produce, supply or offer to supply any psychoactive substance if the substance is likely to be used for its psychoactive effects.

Nicotine, alcohol, caffeine and "Poppers" or alkyl nitrites aren't classed as psychoactive substances. Medicine defined by the Human Medicines Regulations (2012) and drugs controlled by the Misuse of Drugs Act (1971) aren't considered psychoactive substances.

Possession of a psychoactive substance in a 'custodial institution' (prison, young offender centre, removal centre and so on) will be an offence.

The importing of a psychoactive substance, which would include buying a psychoactive substance from a non-UK based website, may lead to individuals being prosecuted.

Possessing any psychoactive substance with intent to supply, supplying or offering to supply, producing, importing or exporting, all carry a penalty of either up to six months' imprisonment or a fine, or up to seven years' imprisonment or a fine.

Offences with psychoactive substances could be considered 'aggravated' if they involved supply to under 18s, were near a school or a children's home.

- [Information on psychoactive substances](#)

Intent to supply and dealing

Supplying drugs doesn't just apply to dealers. If police suspect you're going to share drugs with your friends, this is still considered to be supplying.

Being suspected of supplying drugs means you're likely to be charged. The amount of drugs found on you and whether you have a criminal record, will be taken into account when a punishment is being decided.

The maximum sentences for intent to supply drugs are:

- up to life in prison, an unlimited fine or both for a Class A drug
- up to 14 years in prison, an unlimited fine or both for a Class B or Class C drug

Other restrictions

If you're found guilty of a drug offence, this could affect your future. You might not be able to follow the career you want. Some countries won't let you in even as a tourist, if you're convicted for a drug offence.
